THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

* Documentary

1. The following is a translation of a circular letter sent by Prof. Dr. Horst Philipps, Director of the East German Meteorological and Hydrological Service to all professional members of his organization. The letter was dated 20 November 1952 and reached the members not later than 20 November.

CIRCULAR LETTER

"To all directors of departments, main offices, meteorological and hydro-
logical offices, observatories, research stations, and weather stations.

"For the information of all meteorologists, geophysicists and hydrologists.

"Concerning: Evaluation of the latest meteorological literature.

"At the direction of the Central Office for Scientific Literature, Berlin, a documentation department for the entire field of meteorology, geophysics, and hydrology will be established.

"The purpose will be the setting up of an extensive card index with short tables of contents for all journal articles, papers, and books in the above named fields. The execution of such a plan requires a great expenditure in manpower and time. For this reason I request all interested colleagues to take part in the evaluation.

"The first task of the documentation is to abstract all journal articles now on hand. The library of the main observatory receives 109 domestic and foreign journals. The scientific articles in journals dating from 1945 to the present must be abstracted immediately.

"A catalog from which one can determine the country of origin and the language of these 109 journals has been prepared. With respect to this catalog, I should like to determine the extent to which it is possible for the specialists concerned to undertake the evaluation of one or more of these journals.

"Reviewers are obliged merely to prepare and send to the library of the main observatory a short synopsis, at the most 20 lines (DIN A4), of each individual article.

CLASSIFICATION

[illegible]

25X1

"The library will maintain a file of these abstracts which will be classified according to the DK system.

"The Libraries and Publications Division requests that it be advised by December 15 at the latest which colleagues will participate and in which journal or journals each is interested. In this way personal desires can be taken into consideration.

"It is the intention to make the extensive material collected in this manner the basis for an abstract bulletin to be published by the service (Meteorological and Hydrological Service) for meteorologists, geophysicists, hydrologists. This desired collective effort serves the best interests of our service and thereby all of its scientists. I expect zealous participation of the specialists in this common effort. I request likewise that the Libraries and Publications Division submit to me all suggestions which can expedite the execution of this project."

(signed) Prof. Dr. Philipps
Prof. Dr. Philipps

2. Of the 109 journals mentioned in the above circular letter, 107 are listed below. This listing divides the publications into two large categories: (1) those journals which are to be completely abstracted and (2) those journals in which only the meteorological articles are to be abstracted. Each of these two large classes is then subdivided further into (1) journals of foreign origin, (2) journals originating in West Germany, and (3) journals originating in East Germany.

I. Journals from which all articles are to be abstracted.
